

Teaching Safe Transitions of Care

Jeff Greenwald, MD, SFHM

Jennifer S. Myers, MD

QSEA 2015

ACGME Requirement

- Education in handoffs is required by the ACGME for all accredited programs.
- VI.B.2. “Sponsoring institutions and programs must ensure and monitor effective, structured hand-over processes to facilitate both continuity of care and patient safety.”
- VI.B.3. “Programs must ensure that residents are competent in communicating with team members in the hand-over process.”

Annals of Internal Medicine

Established in 1957 by the American College of Physicians

The Internal Medicine Reporting Milestones and the Next Accreditation System

11. Transitions patients effectively within and across health delivery systems. (SBPE)				
Critical deficiencies			Ready for unsupervised practice	Aspirational
Disregards need for communication at time of transition	Inconsistently utilizes available resources to coordinate and ensure safe and effective patient care within and across delivery systems	Recognizes the importance of communication during times of transition	Appropriately utilizes available resources to coordinate care and ensure safe and effective patient care within and across delivery systems	Coordinates care within and across health delivery systems to optimize patient safety, increase efficiency, and ensure high-quality patient outcomes
Does not respond to requests of caregivers in other delivery systems	Written and verbal care plans during times of transition are incomplete or absent	Communication with future caregivers is present but with lapses in pertinent or timely information	Proactively communicates with past and future caregivers to ensure continuity of care	Anticipates needs of patient, caregivers, and future care providers, and takes appropriate steps to address these needs
	Inefficient transitions of care lead to unnecessary expense or risk to a patient (e.g., duplication of tests, readmission)			Role models and teaches effective transitions of care

Taxonomy of Hospital Handoffs

Extra-hospital handoffs

- Admission
 - ED to floor
- Discharge
 - Home or SNF, rehab
- Inter-hospital transfer

Intra-hospital handoffs

- Shift change
 - with the sender returning
- Service change
- Service transfer
 - Escalation or de-escalation of care (in and out of ICU)
 - Different specialty (med-surgery, OR to PACU)

Comments:

Penn's Handoff Assessment Tool
(adapted from Farnan, et al and Dine, et al)

TMI?

- Overreliance on sign-outs for other work
 - Become unnecessarily long "shadow chart"
 - Often becomes a personal tracker of information
 - "cognitive artifact" like a grocery list
- Loses its' primary function for the receiver
 - Information overload

What We Have Learned (and are still learning)

- What has worked well?
 - Curriculum and Simulation
 - Evaluation tool
 - Standardized electronic sign-out tool
- What has been hard?
 - Sustainability & Tracking of real-time handoff assessments (i.e. Getting anyone to care after September...)
 - Faculty observation
 - Quiet locations for sign-out

Moving Towards Implementation

- The curriculum tools exist; evaluation tools exist
- How will you IMPLEMENT, how will you ASSESS, and how will you SUSTAIN

Discharge Transitions

"At most institutions, faculty relegate the subject of transitional care to the depths of the hidden curriculum in medicine.

Although it is rarely explicitly taught, there exists an expectation that trainees should not only "pick it up" but also acquire a degree of expertise as they move through training..."

Buchanan, Besdine. *Acad Med* 2011; 86:628-39

6

An opportunity...?

Objectives:

1. Why bother?
2. What to include?
3. How to assess impact?

Framing the Problem of Teaching ToC

What barriers do you perceive?

-

Why bother?

The clinician/trainee's answer:

1. To improve the safety of the transition for patients.
2. To ensure patients' goals of care are met across the continuum.

The residency program's answer:

1. To prepare the residents to transition patients safely across the continuum.
2. To meet the need for system's based practice education.

The healthcare system's answers:

1. To reduce unnecessary healthcare utilization.
2. To improve patient satisfaction scores.
3. To reduce readmissions. (HRRP)

One Hundred Eleventh Congress of the United States of America

AT THE SECOND SESSION

*Began and held at the City of Washington on Tuesday,
the fifth day of January, two thousand and ten*

An Act

Entitled The Patient Protection and Affordable Care Act.

TITLE I—QUALITY, AFFORDABLE HEALTH CARE FOR ALL AMERICANS

Subtitle A—Immediate Improvements in Health Care Coverage for All Americans

SEC. 3025. HOSPITAL READMISSIONS REDUCTION PROGRAM.

(a) IN GENERAL.—Section 1814 of the Social Security Act (42 U.S.C. 1395w) (which was amended by sections 3001 and 3008) is amended by adding at the end the following subsection:

(b) HOSPITAL READMISSIONS REDUCTION PROGRAM.—
“(A) With respect to payment for discharges of patients from a hospital (as defined in paragraph (5)(C)) occurring during a fiscal year beginning on or after October 1, 2012, in order to account for excess readmissions in the hospital, the Secretary shall reduce the payments that would otherwise be made to the hospital under subsection (d) (or section 1814(b)(3), as the case may be) for the discharge by an amount equal to the product—

“(A) the base operating rate for the hospital (as defined in paragraph (2)) for the discharge year;

“(B) the adjustment factor (described in paragraph (3)(A)) for the hospital for the fiscal year.

CMS enacts 3025:
The Hospital Readmissions Reduction Program

- Medicare
- Discharge diagnoses initially of CHF, AMI, pneumonia... now also THR/TKR/COPD
- CMS calculates hospital's risk adjusted "excess" readmissions
- Create an adjustment factor for payment =

$$1 - \frac{\text{cost of excess cases}}{\text{cost of all cases}}$$
- Applied to **ALL Medicare bills** for FY15 up to 3%
- Started Oct 1, 2012

Medicare Fines 2,610 Hospitals In Third Round Of Readmission Penalties

By Jordan Rau | October 2, 2014

State	Percent of All Hospitals Penalized	Average Hospital Penalty	Number of Hospitals Penalized
Alabama	75.00%	0.63%	71.00
Alaska	24.00%	0.83%	5.00
Arizona	62.00%	0.58%	48.00
Arkansas	47.00%	1.02%	37.00
California	64.00%	0.41%	223.00
Colorado	34.00%	0.33%	27.00
Connecticut	88.00%	0.65%	28.00
Delaware	86.00%	0.22%	6.00
District of Columbia	78.00%	1.00%	7.00
Florida	79.00%	0.58%	148.00
Georgia	66.00%	0.51%	89.00

Characteristics of Hospitals Receiving Penalties Under the Hospital Readmissions Reduction Program		
Karen E. Jovint, MD, MPH; Ashish K. Jha, MD, MPH		
Hospital Type	High Penalty Odds Ratio	Low Penalty Odds Ratio
Large \geq 400 beds	2	2
Medium 200 – 399 beds	2.1	1.5
Teaching	1.56	1.46
Safety-Net	2.4	1.8

Teaching Accountability at Discharge

Origin: BAAHM meeting

Consolidation/Development: BAAHM Advisory

Driving concept: Keep it local. *Feel the pain.*

Exercises:

1. Bounce back policy reconsidered
2. Telephone f/u to patient and PCP
3. Giving your private number to a discharging patient
4. Simplified FMEA pre-discharge
5. Simplified RCA post-readmission
6. Discharge summaries: a peer review

Teaching Communications

http://www.hospitalmedicine.org/ItemDetail?ProductCode=EDU_BOOST_DVD&Category=DIR&WebsiteKey=5fd01a69-1af2-4511-ae5b-15fa1f9ec298

How to assess impact?

Learner impact considerations:

1. Retrospective pre-test*
2. Peer/faculty observation
3. Durability

http://www.ksbe.edu/spi/survey-toolkit/pdf/ks_tools/The%20Retrospective%20Pre.pdf

How to assess impact?

System impact considerations?

1. Readmission Rate*
2. LOS*
3. HCAHPS*
4. Staff satisfaction/retention
5. Communication
6. Teamwork
7. Culture

*BEWARE!!

Conclusions

Penn's Discharge Transitions Curriculum

Intern year

- Interprofessional Safe Discharge Curriculum (intern orientation)
- Home Visit and SNF Visit (intern curriculum)
- Discharge Summary Skills (2nd half of intern year)

PGY-2 Year

- Review & reflection on one of their 30-day readmissions
- Post-Acute Care Clinic

PGY-3 Year

- Leading the communication and coordination of an interprofessional discharge care team (milestone based)

Miller R, Upton M, Myers JS, Airon-Javia S.

Some Final Tips for Getting Started in Teaching Safe Transitions

- Align your teaching efforts with others who care about this topic:
 - Your Department and/or Division Leadership
 - Program Directors and GME Office
 - Other Faculty in your group
 - Quality & safety leadership
 - Nurses, pharmacists, social workers
